- Establishing and Monitoring a Production Chemical Program School (Becky Ogden)

Tuesday, April 19

- Sucker Rods 101 School (Russell Stevens and Gary Abdo)
- Plunger Lift School (Mike Swihart)
- Beam Lift: Best Recommended Operating Practices (Lynn Rowlan and Steve Gault)

Monday and Tuesday, April 18-19

- Gas Lift Training (Matt Young)
- Rod Pump Analysis and Optimization (Anthony Allison and Chris Cavazos)

SWPSC CONFERENCE AND EXHIBITS

Wednesday and Thursday, April 20-21

- The SWPSC Conference will include ±45 or more papers/presentations on artificial lift, drilling and well completion, production handling, stimulation and workover, reservoir operations and environmental issues. Topics will be presented by industry representatives from many companies throughout the industry.

- The SWPSC exhibits will be in the Exhibit Hall where registrants can browse through them at their convenience. The buffet luncheons on Wednesday and Thursday will also be held in the Exhibit Hall for greater exhibit exposure. Door Prizes will be given away each day of the conference. You must be present to win!
